SUBJECT: Recommendations on the Leak Problem

The attached memorandum presents our ideas and some recommendations on the leak problem. It is the product of two things: (1) three separate meetings with senior staff personnel, and (2) the carefully considered thoughts over a long period of time of the Security Committee. I think it is pretty comprehensive, and some of the ideas have a lot of merit. Unfortunately, the memorandum is also rather long and not well suited for a quick review. My purpose in sending it along as is--and encouraging you to take the time to go through it--is to give you a timely input as you consider remedial action.

We are going to continue to pursue the subject and will advise you of any additional thoughts. And, of course, we are ready to respond to any requirements that you may have for us to develop policies and procedures for the Community.
